

# THE PREDATOR

FROM

420  LENNY

A NEW HIGH  
IN VAPORIZERS

USER GUIDE

## POWER SUPPLY

Your vaporizer is supplied with a Class 2 110 volt power cord. Insert the cord into the back of the vaporizer. The plug works both right side up and down.

420  LENNY

## SWITCHES

The Predator comes equipped with two switches. The switch on the left controls the power, and the switch on the right turns the LEDs on and off. NOTE: LEDs can only be turned on when power is on.

420  LENNY

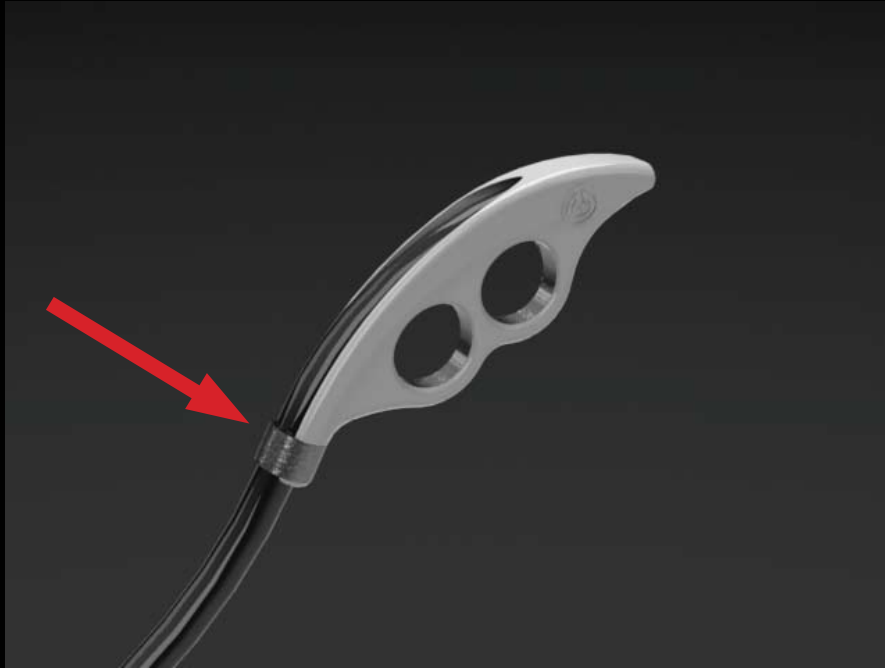

## TEMPERATURE

The temperature control knob is located on the rear panel. Clockwise rotation increases temperature. The ideal temperature for vaporizing is found when the arrow on the temperature knob points directly upward.

420  LENNY

## MOUTHPIECE

The mouthpiece supplied with the Predator is designed to be easily disassembled for cleaning. It is dishwasher safe or easily handwashable.

To disassemble, press down on the small ring compressing the hose and slide it off the mouthpiece down the hose. Now the hose and finger rings will easily slide out of the mouthpiece for cleaning.

420  LENNY

## LOADING

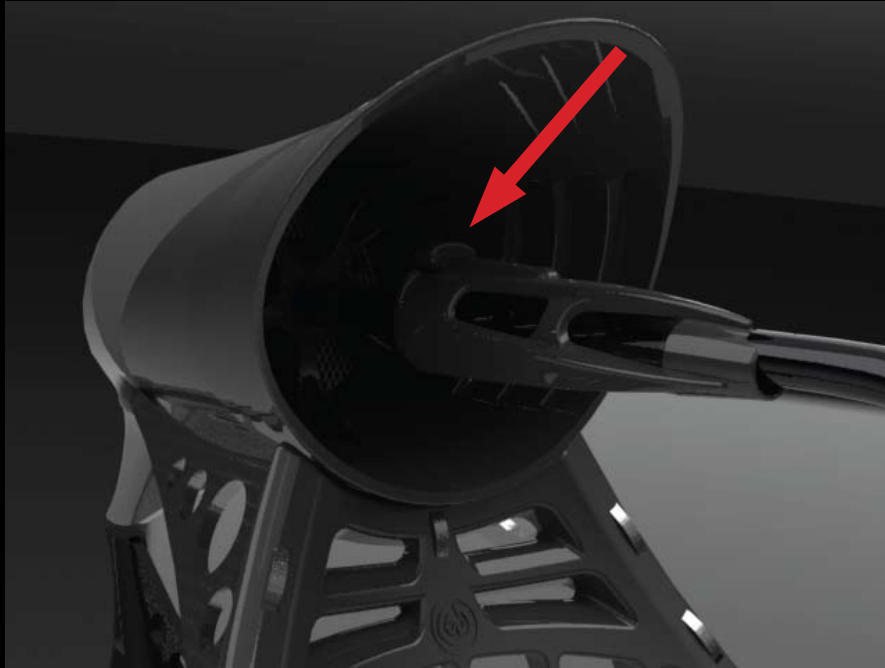

Before loading the Predator, always grind your herb. Grinding increases the surface area of the herb and allows for more consistent and thorough vaporization.

To load the nozzle, place the open end directly over a pile of ground herb. Draw air through the mouthpiece to vacuum up the herb. There is no correct amount of herb to load, but smaller amounts vaporize better.

420  LENNY

## ATTACHING THE NOZZLE

To attach the nozzle to the Predator, simply grip the nozzle and slide it onto the glass heating tube until it stops. You should hear a click indicating it is in place. To remove it, press down with your thumb on the release button and slide the nozzle off of the heating tube.

When the nozzle contains herb and is not being used, it should be removed to avoid unnecessary heating.

420  LENNY

## USING THE PREDATOR

Turn on your vaporizer and allow it to warm up for 3 minutes. Turn the temperature control knob to the center position. Fill the nozzle with herb and attach it to the glass heating tube. Draw in on the mouthpiece. Increase the temperature and draw in again.

420  LENNY

## COMBUSTION

The Predator can be used with the LED lights on or off. When on, the lights dim to indicate that the heating element is operating at maximum temperature and may be too hot. **Do not allow your herb to combust.** Combustion defeats the purpose of using a vaporizer. To avoid combustion, adjust the temperature with the control knob or adjust your air draw speed. Faster draws heat the air more and can lead to combustion.

420  LENNY

## CLEANING

The Predator's nozzle should be cleaned after every ten uses. Wait until the glass is cool and dip one end of a cotton swab into the Predator's specially formulated cleaning solution. Swab the interior of the herb chamber and the screen. Repeat a second time.

Proper cleaning ensures that vapor will be able to pass through the screen.

420  LENNY

## OILS

To heat oils with the Predator, place the bowl attachment on the glass heating tube and add oil. A sample of oil is included with your vaporizer, and the dropper is sized to deliver the correct amount of oil with just one dose.

420  LENNY

## LIMITED LIFETIME WARRANTY

The Predator comes with a no-hassle limited lifetime warranty for the registered original purchaser. The warranty covers the electronics and heating system and does not cover any damage caused by misuse. Older vaporizers may be eligible for a discounted upgrade if the vaporizer is not repairable.

Register your vaporizer by completing and mailing in the included warranty card, or by visiting [www.420Lenny.com](http://www.420Lenny.com) and completing the online warranty form. Any information you supply will remain confidential and will never be shared or available to other vendors or marketing companies.

420  LENNY

# CAUTION

Misuse of the Predator could cause damage to the product or injury to the user. Only use the Predator for its indicated purpose. Any misuse violates the terms of the limited lifetime warranty. The manufacturer holds no responsibility for any damage or injury caused by the misuse of this product.

Never touch the glass heating tube. It reaches extremely high temperatures and retains heat, so it can be very hot even after the unit is turned off.

Never use the Predator with another whip, only with the whip and nozzle that were supplied with it.

420  LENNY

# COMPONENTS

The following parts are included with your Predator:

- Washable mouthpiece
- 110V Class 2 power cord
- 30" Class B black medical-grade tubing
- Locking nozzle
- Nozzle cleaning solution
- Cotton swabs and container
- Air tight herb container
- Herb grinder
- Aromatherapy bowl
- Aromatherapy oil with dispensing cap
- Travel case with shoulder strap
- User guide
- Warranty card

# ABOUT US

Lenny Pechner

After years of using poorly designed vaporizers that wasted my time, money, and herb, I decided to design and build a better vaporizer. The result of more than a year of engineering and testing is the Predator. It is engineered to be attractive, light weight, durable, user-friendly, and, beyond anything else, efficient.

It wasn't engineered alone, so I would like to take this opportunity to say thank you. To my daughters Stevie and Reanna, for being the best daughters a father could ever ask for. To my friends, who encouraged me and my family, who were understanding of my entering a controversial industry. And especially to my father, Murray, for teaching me how to design, engineer, and manufacture.

Finally, a great big thank you to Phil Dow and Ashley Cantieny at Trisix Design group. Their talent and commitment to this project are the reason we are confident when we call the Predator the world's finest vaporizer.
